GIANT NEW BUILDING AT FORT MEADE—This aerial view shows the hush-hush National Security Agency's new $35,000,000 home at Fort Meade. The building, to be completed in November, contains 1,400,000 square feet of floor space and is said to be about one fourth the size of the Pentagon. It represents the largest military construction job ever undertaken at Fort Meade. More than 12,000 employes will move there from Arlington Hall in Virginia.
