## MBYOORAKDUM FOR DISYIRIBUIION EIST:

## SUBJECT: Dietograph Intercomn Boxes

1. The Dictograph intercommaication office bowes recently installed in Armed Forces Security Agency are of two types, i.e., executive boxes and staff boxes. General Canine has the only executive box in AFSA.
2. One ataff box can call another ataff box by lifting the handset from the hook, pressing the desired party black key up or down, and then pressing the green ring key. The staff party so calied answere the call by merely lifting his handget and speaking.
3. An executive type box (General Canine's Intercomm box) calls a staff box by merely pressing the desired party key. The buaz in the staff box will be continuous until answered by the staff member who accomplishes this by lifting his handset then pressing the black key where white flag appears, and speaking. A staif box can call an executive box by pressing General Canine's black key and then apeaking into the handset.
4. It is to be noted that an executive type box is called by a staff box whenever the General's key is depressed whether the handeet is on or off the hook. The ring key is of no effect here. Therefore caution must be exercised so that the General's key is never deprenged unless it is desired to call General Canine.
