February 16, 1943

MEMORANDUM For: Lt. Cdr. Boone

1. In accordance with our conversation a few days ago, I am sending you herewith a German book of cryptography entitled "Chiffrieren mit Geraten und Maschinen by Turkel," which I believe would be very useful to have in translation. Please sign the accompanying receipt and return it to me.

2. The book contains markings which would indicate that it has been translated and I hunted high and low for the translation but so far have been unsuccessful. However, I think the book is well worth retranslation even so.
