

26 October 1944.

Mr. Lenox R. Lohr, President,
Museum of Science and Industry,
Jackson Park,
Chicago 37, Illinois.

Dear Lohr:

I was much interested in the outline of the talks to be given at the Museum, and to note how you have worked out the talk having a close relationship with the subject of codes and ciphers. I am sure that your audience will be highly interested in the talk to be given by Dr. Christ, possibly more than they would be in a talk directly on codes and ciphers.

With best regards, I am,

Sincerely yours,

William F. Friedman,
Director of Communications Research.

Approved for Release by NSA on 07-16-2014 pursuant to E.O.

POPULAR HOBBIES
at
THE MUSEUM
OF
SCIENCE AND INDUSTRY

Wednesday Evenings at eight o'clock
OCTOBER 18 TO NOVEMBER 22

Admission 25¢

Illinois Central 57th Street
Motor Coach No. 1 or No. 2, to 57th Street
Street Car Stony Island car to 57th Street
Elevated Jackson Park train to end of line,
free transfer on street car north to
57th Street

The air is full of new ideas today. Are the doors of your mind unlocked to receive them?

Have you a hobby, or are you looking for one? The Museum series of hobby lectures may help you find a new field or develop your old one.

In addition to the lectures, exhibits will be on display: beautiful bindings and old books, the recovered art of fore-edge painting, manuscripts and autographs, gems and rocks, needlecraft and woodcraft.

There is nothing like a hobby for awakening the creative faculties, and clearing one's mind for fresh ideas when it is tired and strained from the day's routine. Many a business man or scientist worn out with a knotty problem is blessed with a flash of inspiration when relaxed in pursuit of a hobby.

October 14, 1944

Mr. William F. Friedman
Head Cryptanalyst
War Department
Office of the Chief Signal Officer
Washington, D. C.

Dear Mr. Friedman:

I want to thank you for the telegram you sent me concerning using Cryptography as a subject for our current lecture series.

You will be interested to see what we eventually worked out. Dr. Christ is teaching codes and ciphers in one of the University of Chicago's military courses, and it was his suggestion that we use either puzzles or detective work as one of our subjects, and he gave us much interesting information on the popularity of both of these as hobbies.

With every good wish and with appreciation of your courtesies,

Sincerely yours,

Lenox R. Lohr
