SIGINT RELATIONS WITH	
VISIT OF U.K. REPRESENTATIVE TO SEPT. J. BER 1954.	
I. <u>INTRODUCTION</u>	
After the July 195% UKUSA Conference on Comint relations with the , it was arranged (with the knowledge of Director N.S.A.) that the action to be taken by the U.K. in respect of should be initiated when the U.K. officer from Admiralty who conducts liaison with the unitary visited in September. This report summarises the results of the negotiations which took place during this visit.	t
II. L SECURITY /	
2. One of the tasks of the U.K. representative was to enquire into security arrangements, to make sure that these satisfied the standards considered to be necessary before the existing U.K. contacts could be widened.	
3. The internal security of the	
was found to be of a very high standard. Personnel are accepted for employment only after searching police enquiries, and even then are not permitted to work in any vital part of the organisation unless they are known personally to four senior officers. Documents are maintained which show considerable details about applicants for employment, including bood group and lists of all foreign nationals with whom they are acquainted.	
4. The U.K. representative was shown copies of the security regulations of the organisation, and its "signing on" and "signing off" forms.	
control of the security of the recipients of Sigiend-product was found to be less tight than that operated in the U.K. and the U.S. The Director of Intelligence on the has however agreed to receive a full briefing on this problem when he visits London shortly. The authorities themselves are confident that after this visit they will be in a position to enforce a degree of security control of recipient adequate to meet the requirements laid down by the U.K.	s _
6. The paper which was presented to show these requirements appeared to impress the, and they are anxious to introduce its principles as soon as possible. As it happens, a re-organisation of both Intelligence and Security is at present taking place in so that our approach on this subject was very timely.	

Enclosure 2 with USCIB 29.17/10 dtd 5 Nov 1954.

PROPOSED U.K./U.S. EXCHANGE PL 86-36/50 USC 3605
7. The showed considerable reluctance to allow the U.K. to pass material obtained from them to the U.S., but they finally agreed that Elint results could be released forthwith and other material later, subject to:
(a) satisfactory security assurances (which were given by the U.K. representative);
(b) a-guarantee of U.S. support in the supply to them of modern interception equipment; for both Comint and Elint.
(c) the supply of such equipment through the existing U.K. channel from no other delivery route being acceptable for security reasons;
(d) complete and immediate cessation of any Sigint (Comint and Elint) approaches to by any U.S. authorities.  PL 86-36/50 USC 3605
3. Recause of the inconsistency of the proposed arrangements with the policy of neutrality, placed particular emphasis on this last point, saying that, if any further approaches were made by U.S. authorities, all the arrangements now being negotiated would have to cease. He added: "I should be hung if these arrangements ever came to light", and said that he would not assist in his own downfall by signing anything. He also stressed the requirement for modern U.S. interception equipment as a quid pro quo for the results which the U.S. would be getting from the new arrangements; money would not be acceptable in its place. (Detailed proposals on the provision of equipment are being taken up with the U.S. Elint authorities).
9. The U.K. representative said he thought it would be possible to satisfy the conditions.
IV. MISCELLANEOUS
10. W/T link - The general plan for the setting up of a W/T link between and the U.K. for the , was agreed, and details will be discussed in the course of a proposed visit to London in November.  It is hoped that the link will be opened in the spring of 1955. The
