

~~CONFIDENTIAL~~

2nd. Memo Ind.

10.

OCSigo, Research and Development Division, April 23, 1936. To: Mr. W. F. Friedman, THROUGH O.I.C., War Plans and Training Division.

1. At its Meeting No. 2, held April 17, 1936, the Patent Board, OCSigo, made the following recommendations with reference to your invention covering modification of Converter, Type M-134-T1 (now covered by patent No. 2,028,772):-

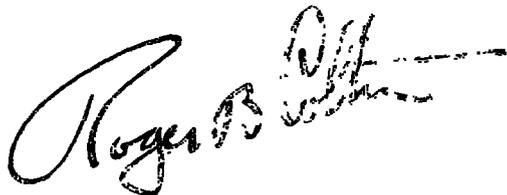

"I c. The Board recommends:

(1) That the action proposed by Mr. Friedman in paragraph 2 of his memorandum of March 24, 1936, to Research and Development Division (through War Plans and Training Division) be approved, and that Mr. Friedman be instructed to submit specifications to the Patent Section for the necessary action with a view to obtaining Letters Patent.

(2) That the invention be not considered important in the National Defense, and that a non-exclusive license to the Government, in writing, be required."

2. The proceedings of the Patent Board were approved by the Chief Signal Officer on April 23, 1936.

3. Upon receipt of the description it will be processed in the usual manner with a view to obtaining letters patent.

Roger B. Colton,  
Lieut. Col., Signal Corps.

Attached:  
(no change).
