WAR DEPARTMENT
OFFICE OF THE CHIEF SIGNAL OFFICER
WASHINGTON

April 9, 1936.

Memorandum For Major Walter C. Ellis (Room 3431)
R & D Div. OCSigO

Subject: Modification in Converter Type M-134-T1
(U.S. Patent 2,028,772 of Jan. 28-1936)
Invention of Wm. F. Friedman

1. Reference your memorandum of 4-5-36 and Mr. Friedman's preliminary disclosure submitted with his memo. of 3-24-36.
2. This is a modification and improvement based upon the system which forms the subject-matter of the above-identified United States patent issued to Messrs. Friedman and Graham.
3. Since the prior art has been rather fully developed in connection with the prosecution of the parent case (U.S. patent above), the modification appears to be patentable and would justify the filing of a new patent application in due course. It is noted, however, that there will follow a complete patent specification to be prepared by Mr. Friedman.

All papers returned.

Charles A. Rowe,
Patents Section, Signal Corps.
