2. In regard to furnishing the Navy with the material requested for the purpose of turning over the documents to the course indicated in Par. 2 of Action 1 is believed to be warranted and should be affirmed as a general policy for the guidance of AS-70.

3. This case again shows further need for prompt action leading to the establishment of ANCRECC. In the meantime it is recommended that AS-70 be requested to contact the Navy informally with a view toward ascertaining, if possible, what Navy projects are underway or are contemplated in the ciphers and cifax fields. This may bring to light interest and may be helpful to the ASA in preventing useless or unprofitable duplication of effort.
