

NATIONAL SECURITY AGENCY  
WASHINGTON 25, D. C.

Date: 1141  
23 Feb 55

~~TOP SECRET~~

SUBJECT: Report of Communications Security Violations

TO: Chief of Naval Operations (OP-30)  
The Pentagon

1. Attached is the quarterly (October through December 1954) compilation of communications security violations reported to or noted by this Agency which occurred in communications of those Navy stations which handle COMINT traffic. You have been notified of completed evaluations of possible compromises which are reported herein as violations.

2. This report is furnished primarily for guidance in improving the security of COMINT communications. Similar reports are forwarded to Chief, Army Security Agency, and Commander, U.S. Air Force Security Service. Upon request, additional copies of this report will be provided in sufficient quantity for dissemination to those activities under your Command engaged in COMINT operations.

3. Extracts from this quarterly summary may be classified SECRET if the extracts are restricted to lists of violations which involve messages classified no higher than SECRET. For example, the list of violations committed by an activity which originates messages classified no higher than SECRET may be extracted and forwarded to that activity as SECRET material. The key list is SECRET in classification.

4. This correspondence may be downgraded to SECRET upon removal of Inclosure 1.

FOR THE DIRECTOR:

*E. M. Gibson*

E. M. Gibson  
Lt. Col., AGC  
Assistant Adj. Gen.

Declassified and approved for release by NSA on 05-15-2014 pursuant to E.O. 13526

- 2 Incls:
- 1. Communications Security Violations  
by Navy Stations.
- 2. Key List of Navy Violations.

KEY LIST OF NAVY VIOLATIONS

October, November, & December, 1954

ROTOR ARRANGEMENT

1. Use of a rotor arrangement for an inappropriate cryptoperiod, day, or month. (Reference AFSAG 1262, para 5006a(1))

ROTOR ALIGNMENT AND MESSAGE INDICATOR

2. Discrepancy between the message rotor alignment resulting from decipherment of the message indicator and the message rotor alignment actually required to decipher the message, although the latter was correctly derived. The discrepancy involves (a) transposition of letters, (b) substitution of a letter alphabetically adjacent to the correct letter, (c) substitution of a phonetically similar letter, or (d) errors in encipherment.
3. Failure to tail previously enciphered message. (Reference AFSAG 1262, para 6002a(4))

KEY GROUP

4. The trigraphic key-group indicator in the message indicator did not correspond to the key group actually used for encipherment. Reuse of a key group was not involved. (Reference AFSAG 1262, para 5004b)

MACHINE DESIGNATOR AND MULTISWITCH SETTING

5. The machine designator in the message indicator did not correspond to the multiswitch setting used for encipherment. The messages were (a) correctly enciphered or (b) incorrectly enciphered. (Reference AFSAG 1262, para 6002a(1))
