1. Your 700/1 ratio of dollar spending
in our best estimate of value of Comdata
Am 3 W W II.

2. It is reasonable to accept this as an
estimation of the value of at least the research
effect of AFSA, if this is successful.

3. AFSA's research budget is said to be
of the order of magnitude of $1.4 \times 10^7 \$ vr. yr.

4. $1.4 \times 10^7 \times 700 = 10^{10} \$ vr. yr.

5. As an off-the-cuff guess, $10^{10}$ is about
5\% of the national income - this
may be a very poor estimate.

6. There are about 50 military men on active
duty with rank at least 3 stars or comparably
many civilians in the grades. This is an unsatisfactory
estimate.

7. AFSA does not have a fan percentage of this.

8. AFSA has no charter authority to protect this
tremendously important position & autonomy.
If possible at all will come about through best through the influence an officer of high rank (at least 3-stars) implicitly wields—especially if he is one who is sounding.
