To: Helsinki (RIKUGUN)
16 April 1944
JAS

#851 Parts 1 - 3, and 5*.

(Part 1) Answer to your wire #114.^a

Turkish codes:

1. These are of two types, 4-digit codes and 5-digit codes; all telegraphic text is sent in five-digit groups.

2. We are working on these codes here in Japan. Among them there are many whose first five digits add up to 29, 00, and 25. The key is determined through this.

All these codes are simple codes^b and are low grade.

(Part 2) 3. We would like you to inquire into the following:

---the form

---the division into one-part codes and two-part codes^c.

---end and beginning characteristics.

---a number of spelled-out groups.

4. We would like you to investigate and report on the following with regard to the codes whose first five digits add up to 29:

(a) 0980 1326 3097 4514 5850 6174 6780 8406
7143 3384

(Part 3)

(b) A IQDAN DE DAN L R N E I ETMEK
ILE BU BIR VE TELE.

(c) We would like material in any form you can obtain it, but if possible, we would like a chart showing plain text groups and code groups.

(d) Material --4G--.

(?Please sound out?) the Finns on Bulgarian codes.

(Part 5)	5	8	1	6	3	9	6	5	1	4	Ø	5	5	3	5	9	9	7	8						
4	6	9	Ø	9	Ø	5	9	7	7	1	1	5	1	2	4	9	6	3	7	2	5	*	d	*	
9	8	4	6	9	3	1	6	5	3	7	2	Ø	8	5	9	6	7	8	Ø	2	2	9	7	d	3
