MEMORANDUM FOR THE PRESIDENT

SUBJECT: Chronology of the Gulf of Tonkin

I attach the chronology of the Gulf of Tonkin affair which you asked for from McNamara. I had sent it back for correction on a couple of small points, and I have read it myself to see if I could save you any time, but my conclusion is that you will probably want to read it all the way through yourself when you have time.

There is still no evidence whatever that the timing of your announcement adversely affected the success of the operation in any way. All the evidence, indeed, runs the other way. The appendix to this report shows that North Vietnamese did have the aircraft in their screens before you spoke. The post-strike estimates show that there was no significant alert in the ports struck by the first attack from TICONDEROGA. The planes we lost were lost in the second strike several hours later, long after a complete alert had been given by the first attack. Moreover, it is clear that you yourself never gave any assurance of the kind Halleck claimed. Finally, the record of public discussion suggests that Goldwater's charges and Halleck's have been rejected by sober commentators and by the American people. Nevertheless this record does make it clear that we narrowly escaped a dangerously early announcement of the attacks. The reasons for this are four:

(1) Admiral Sharp and other military officers repeatedly assured McNamara that it would be a simple matter to mount an air strike in the early morning in the Gulf of Tonkin. This assurance led to initial planning built around a 7 p. m. announcement here, and when these estimates proved gravely optimistic, McNamara himself became increasingly impatient and eager to get the matter announced.

(2) Communications in this around-the-world operation were slower than McNamara and Sharp expected them to be. Thus, there were repeated delays in getting the final orders to execute from Washington to the carriers. There was also confusion about time zones which cost us an hour of planned time.

(3) This same time lag, in reverse, made us slow to understand the difference between the real operation and the one which Sharp and McNamara had in their mind's eye. Neither of them knew until late in the evening, our time, that there would be a time interval of 2-1/2 hours

between the first launch and the actual strike in the case of TICONDEROGA. They assumed 40 minutes to one hour.

(4) Finally, we were a little casual in Washington about acting on this accurate information of TICONDEROGA's strike plan when it did arrive. It was known to McNamara in the Pentagon and to officers in the Situation Room here ^{just} before you went on the air, but no one told me -- or you -- as far as I know. Indeed, Bob McNamara does not seem to have got this fact clearly in his own mind, because in his own press conference just after midnight he wrongly said that the carriers "have already conducted air strikes against the North Vietnamese bases."

The net of this is that we were saved from real trouble by your own stern and repeated insistence on positive assurance that the planes were in the air well before you spoke, and by the other facts cited earlier.

Bob McNamara is the ablest man in the government, but when he makes a basic decision and gets up a head of steam, he does not always keep the sharpest eye out for new evidence. Others of us could have been more alert than we were to help guard against this one weakness of an extraordinary man.
