Oswald Calls to Embassies Reported by C.I.A.

By NICHOLAS M. HORROCKS

WASHINGTON, Sept. 20—His pro-Castro activities were followed up on the information provided by the Central Intelligence Agency secretly tape-recorded two telephone conversations between Lee Harvey Oswald and the Cuban and Soviet Embassies in Mexico City some eight weeks before President Kennedy was shot to death on Nov. 22, 1963, in Dallas, Government sources familiar with the events said today.

The call to the Soviet Embassy, according to the sources, alerted the C.I.A. to the presence of Oswald in Mexico City and on Oct. 10 the agency warned the Federal Bureau of Investigation. There is no indication that the F.B.I., which was investigating Oswald for

Secretary of State Kissinger with Shimon Peres, Israeli Defense Minister, after their meeting in Washington.

Chilean Junta Resisting

By JONATHAN KANDELL

SANTIAGO, Chile, Sept. 18—Two years after the bloody coup that toppled the Marxist coalition government of President Salvador Allende Gossens, the military junta that governs Chile has developed a siege mentality against critics of its harsh economic recovery program and of its continuing violations of human rights.

Unemployment is at its highest in at least four decades and industrial production has dropped sharply this year.

But the junta has vowed to continue its austerity program aimed almost exclusively at dampening the perennial inflation and diminishing its state's role in the economy.

Arbitrary arrests and re...
Lee Harvey Oswald

The photograph of Lee Harvey Oswald, the assassinations and the raw data upon which they were based, along with the reports of his visit to the Soviet Embassy, were made public in the Warren Report as well as in the Rockefeller Commission reports. The reports suggested that the Warren Commission's conclusions were based on information provided by the CIA, which had interviewed Oswald shortly before his death.

From F.B.I.

This biographical data was used to identify any additional individuals involved in the assassination. The F.B.I. followed up on any unexplained visits by an American citizen to communist embassies and consulates, a practice that had been particularly watchful in the case of Oswald, who had been active in the anti-communist movement. The bureau gathered information on Oswald’s tourist activities and his contacts with other anti-communist groups.

Sure Others Learned

Mr. Coleman said he was certain that J. Lee Rankin, the assistant director of the CIA, had been informed about the visit to the Soviet Embassy, and that he had been asked to provide any additional information that might be relevant.

Sanitation

Sanitation personnel there have been cut from 1,200 in the 1930s to 600 today, with the 1,600 tons of waste generated daily in New York City.

Personnel Cuts

Sanitation Commissioner Robert T. Groh, who resigned a year ago, criticized the department's performance, attributed the unsightly streets and overflowing rubbish barrels to manpower reductions. An average of 3,100 men is on duty daily now, compared with 4,000 in former years.

If more men are not hired, Mr. Groh said, "we'll just have to get accustomed to living with the filth."

Solutions suggested in other cities included new laws and regulations on sanitation, the use of all-purpose returnable bottles, and the painting of workers' names on sanitation trucks to enable citizens to hold the workers responsible for sloppy work.

Mr. Powers of Keep America Beautiful professes optimism. The fiscal crisis of the nation's cities, he said, are making more people aware that they can no longer rely on government to solve all their problems.

"This is a very, very slow process," he said. "I'm not suggesting there is a big movement across the country and we will have the situation cleaned up in five years. But there is a new attitude, and I am encouraged."
