

NSA/CSS Evaluated Products List for Paper Disintegrators

OVERVIEW

Devices included on this list have passed evaluation by meeting requirements set by the NSA/CSS for the disintegration of paper with notations to those devices also approved to destroy punched (key) tape, and CDs. Meant to serve as guidance, inclusion in this document is not an endorsement by the NSA/CSS or the U.S. Government. All listed products sanitize TS/SCI and below.

QUALIFICATIONS FOR APPROVAL

The NSA/CSS established the following performance requirements against which these disintegration devices have been tested:

- The device must reduce paper and/or punched tape to an edge size of 3 millimeter by 5 millimeter, or less.
- Testing protocol includes the timed destruction of mixed storage devices.
- Devices that meet NSA/CSS sanitization specifications for the following storage devices are identified with the following approval ratings:
 - P = Paper
 - K = Key (punched) tape (plastic or paper)
 - C = CDs

Equipment is listed in alphabetical order by vendor. Alternate or previously used retail names appear in parentheses.

Models that are no longer manufactured but still approved are included.

Vendors submitting equipment for evaluation will no longer have their return shipping costs funded by NSA.

Questions about specific models not shown can be directed to the Center for Storage Device Sanitization Research at 301-688-1053 or CSDSR@nsa.gov.

WHAT YOU NEED TO KNOW

1. This list serves as guidance for the destruction of paper storage devices, and identifies devices also approved for the destruction of paper/plastic punched (key) tape and CD optical storage device format. For storage device specific equipment, refer to the *NSA/CSS PM 9-12 Storage Device Sanitization Manual*.
2. It is recommended to mix paper with CDs during destruction.
3. Devices within this document are NOT authorized for DVD or BD sanitization.
4. Each device offers different convenience features, footprints, throughput rates and power requirements. Contact the vendor to identify the unit(s) best suited to your site's needs.
5. When a product is removed from the EPL due to security reasons a grace period of six years for continued usage is in effect for DoD customers. IC customers follow your organization's policy regarding this matter. Government Contractors should follow guidance/policy of their cognizant government industrial security oversight organization.

This document is updated on an as-needed basis. The procedures for administration and distribution of the EPL are subject to change without notice.
