OVERVIEW

Devices included on this list have passed evaluation by meeting requirements of NSA/CSS for the destruction of punched (key) tape. Meant to serve as guidance, inclusion in this document is not an endorsement by the NSA/CSS or the U.S. Government. All listed products sanitize TS/SCI and below.

QUALIFICATIONS FOR APPROVAL

Performance testing evaluates the device’s ability to reduce plastic and paper/plastic laminate punched tape materials to 2.5 millimeter by 0.5 millimeter edge size, or less.

The models listed in this document have met the NSA/CSS Specification for the destruction of paper, plastic, and paper/plastic laminate punched tape materials.

Equipment is listed in alphabetical order by vendor and contains all punched tape destruction devices that have passed evaluation.

Models that are no longer manufactured but still approved are included.

Vendors submitting equipment for evaluation will no longer have their return shipping costs funded by NSA.

Questions about specific models not shown can be directed to the Center for Storage Device Sanitization Research at 301-688-1053 or CSDSR@nsa.gov.

WHAT YOU NEED TO KNOW

1. This list serves as guidance for the destruction of punched (key) tape only. However, some of these devices are also approved for the destruction of CD optical storage device format.

2. Each device offers different convenience features, footprints, throughput rates and power requirements. Contact the vendor to identify the unit(s) best suited to your site’s needs.

3. When a product is removed from the EPL due to security reasons a grace period of six years for continued usage is in effect for DoD customers. IC customers follow your organization’s policy regarding this matter. Government Contractors should follow guidance/policy of their cognizant government industrial security oversight organization.

This document is updated on an as-needed basis. The procedures for administration and distribution of the EPL are subject to change without notice.
