Case Number	Receive Date	Subject	Disposition
111663	4/8/2021	Three hovering sphere shaped objects appeared around 5:00 am. They were large, almost the size of planes. The objects were glowing (white light) and were hovering about 15 feet above the ground. They weren't making any sound though. No engine noise; completely silent. They traveled in a line then shot across the dark sky at a supersonic speed. Requesting information regarding what you may or may not know about these hovering spheres. Can tell you they are peaceful, they're only observing us. They are actually quite friendly. While like to go into further detail about the encounter, ask that we do an exchange of information. Am certain can help with your investigations into these beings. People fear what they don't know. The more we inform the public of these beings, the more info we give them, the less we have to think about panic. Believe in the American people. We're smart, tough, free-thinkers. These beings are not out for destruction, if they were, don't you think they would've tried already? They are simply observing our way of life. They actually think our technology is a bit antiquated (no offense). Space exploratory is not a far fetched thing to these beings. They make trips to Earth within minutes and they make it look so easy, like a drive to the local corner store. Not looking to expose any intelligence gathering methods, because understand the sensitive nature and the risks involved in doing so. Love America wouldn't dare want her precious military secrets leaked or exposed to our adversaries (Russia, China, etc.). That's not what asking for. Just want people to be more informed about what is out there, because we both know they're out there. By the way, it didn't have to take us that long to get to Mars... we could've gotten there in about 30 minutes or less. Know that sounds crazy, but it's true. Let's talk. Date range of requested records: January 2015 to April 2021	Granted In Full
