Dr. H. P. Robertson  
 Hogan Bridge Laboratory of Physics  
 California Institute of Technology  
 Pasadena 4, California

Dear Dr. Robertson:

In his letter of 11 July 1952, Mr. Friedman wrote you that in a little while he might send you a draft of a statement of a charter and mission for a new SCAG, and would ask for your comments.

Since Mr. Friedman is on vacation, I enclose the draft and would be grateful for suggestions as to changes, additions, or deletions.

In this connection, now that you have a good background for assessing our needs as to consultants' services, if you have in mind any specialists who, in your opinion would be potentially valuable candidates for membership in our proposed new scientific advisory group, please let us have their names and addresses. I understand that one of the consultants to SCAG is Dr. Marshall Stone, and assume that you have known him for a long time. I know of his eminence in the mathematics world but do not know how he would cooperate, personally, within a small group of equally capable specialists. Anything you can tell us privately which might help us come to a conclusion as to his candidacy will be appreciated and be held in strict confidence.

Sincerely,

J. W. WELCHER  
 Rear Admiral, USN  
 Deputy Director, AFSA

Enclosure - 1  
 Draft copy of  
 AFSAASB charter.

W.F.Friedman/eby/21 July 52  
 Consultant
