	cellent beginning. It is sug-
gested that a training period of about three months would be sufficient	
for and this could be followed with some operational work if	
mutually agreeable.	
3. A precise list of subjects to be covered and the amount of time	
to be spent on each would be difficult to establish at this time. It is	
believed that the next subject should be selected during the training	
period of the initial individual. CB might, however, find it useful to send someone for a rather extensive period on the 1401 prior to the receipt	
of the 1401 in Ottawa. Further, it might be useful to CB if, in addition	
to the range of subjects proposed, and analysis be	
considered.
