1. Herewith draft of proposed ltr. Note I've made it to Denniston rather than to Travis because former has diplomatic. Although I'd suggest ~~including~~ <sup>including</sup> a copy to Travis.

2. CIC B For has seen this draft & concurs.

HEADQUARTERS ARLINGTON HALL STATION  
OFFICE OF THE COMMANDING OFFICER  
ARLINGTON VA

8 January 1944

Dear Cmdr. Denniston:

Friedman has suggested a type of study which might be highly useful even though it would have to be recognized that it would obviously involve a good deal of guesswork. Maybe you have already made such a study and if so, we would be very appreciative of receiving a copy. If you haven't we would be very glad to collaborate with you. The study he proposes is as follows:

The importance of having definite information as to what the Germans and Japanese are reading of the diplomatic systems used by presently neutral governments such as Turkey, Portugal and Spain, is obvious because of the effect it would have on our own diplomatic negotiations with those neutrals. Assuming that the Germans and Japanese are satisfied that we are not reading their high-grade systems, which seems a very reasonable hypothesis, and using this assumption as a guide or a measure of the technical prowess of their cryptanalytic staffs, which of the cryptographic systems used by the foreign offices of the currently neutral governments could they be expected to read? Which are they certainly reading? Which are they probably reading? And so on. Such a study would, of course, have to be correlated with data as to the extent and sources of raw material available to them; for example, it would be clear that traffic sent by land lines or cable and not within their physical reach would not constitute source material for them.

Of course, we do have a small amount of information on this subject, gleaned from reading certain German and Japanese messages. If the data were all assembled and evaluated they might make a good basis for elaborating on the subject which Friedman suggests. I would be very glad to have your comments on the foregoing.

Sincerely,

*WPC*
