~~CONFIDENTIAL~~

Declassified and approved for release by NSA on 09-29-2014 pursuant to E.O. 13526

SECRET

i. Four pages in Spanish of instructions for handling the CX 52, and one page of pin settings apparently belonging with same

j. Three pages of scanty notes on cross section paper, including a few personal names.

k. Six sheets of blank cross section paper

l. One page comprising a certification, apparently of character, by the police of Zug, Switzerland.

m. Two pages with the official heading of the Stadtrat, of Zug, certifying to Hagelin's residence and character

n One page on the paper of the Stockholm police which appears to certify to Hagelin's birth and citizenship

o One page on the paper of the Crypto-AG to the Colombian Legation, Berne A certification by the Hagelin Co as to their acceptance of responsibility for Boris Hagelin, and his travel expenses

p One page in Swedish which appears to be a birth certificate and records his fathers full name as Boris Caeser Vilhelm Hagelin, and mothers name as Annie Katarina Vilhelmina Hagelin ne Barth.

2. After SEC has had an opportunity to fully examine the stack of documents, I am dividing it into two parts, the technical material to be returned to NSA-062 for retention, and the non-technical material to be retained in the Hagelin files in my custody

L E SHINE

cc: NSA-062 (Mr Monroe)
Chief, SEC (2)

~~SECRET~~

(6) Letter to his wife, signed Esther, from E. S. Frazier, Apt 522, 1711 Mass. Ave., N.W., Wash. 6, D.C., 7 Feb 1956 Personal letter, referring to impending move to the U.S

(7) Letter to his wife, signature nearly unreadable, Kristoffe--- from Pinapang, 30 January 1956 This letter is in German.

(8) Letter to Edith and Bo, no envelope, no return address, dated 2 Feb 1956, appears to be from Mrs Hagelin's father on the west coast This is a personal letter concerning impending move to the U S

c Two copies of a price list of the CX 52 and associated parts

d A calling card of Roberto Krause, of Erickson and Co , of Lima, Peru Note: It is known that Erickson and Co represents the Hagelin firm as an agent in South America

e One and one half pages of an unfinished, unsigned manuscript letter, in English, addressed to Crypto-AG, Switzerland, beginning Dear Sirs. There is no return address or date line. This letter, because of its interest, is quoted here entire: "During the two weeks I have stayed here the following actions have been taken. The first week we had a course for mechanics, where the Army Signal Corps, Air Force, Navy, Police, and the Foreign Affairs were represented. Most of the students were of high class and they continued to study the machines by themselves the second week, and they are writing instructions in Spanish for the disassembling and assembling for the mechanism I am content with the result of the training of the men and I am certain that they will be able to keep the mechanisms in good running order The instructions for the office regarding the possibilities of the machines in a cypher point was held the second week. There, the Army was represented by two Colonels, the Air Force with one Captain, the Police with one Lieutenant, the Navy, one Second Lieutenant, and the Foreign Affairs with one man All the gentlemen were properly learned how to set up the keys and as the course continued their interest increased They are quite enthusiastic about the machines During my visits at the Ministry I had a very (two words unreadable) from Mar Veltberg (spelling uncertain) and Malmstron (spelling uncertain) UME and they are now also very well acquainted with the machines During the courses we (two words unreadable) visit by: (at this point a space of approximately 3 manuscript lines is left blank) which had a big interest in the (one word unreadable) of instructions The course was held in the conference room of the Minister of Defense One demonstration was held for the Intelligence Service and they have decided to buy 60 machines Please see enclosed offer Also they (ltr ends at this point)" The parenthetic notes above are mine

f One manuscript page of Hagelin machine pin settings

g Three pages comprising a brochure on CD 55

h. Three pages of a brochure on the CY 52 On the back of one of these pages there are some arithmetic computations of unknown significance

Dear Edith Thank you so much for the photo of the newsboy. They are really attractive and congratulations to Ed and you on the birth of the big boy. You have a very little family but I have admit that the male side of it could do with a bit of reinforcement.

I am afraid Dorothy did not enjoy her trip with your Mom and Dad. They both look grand as well, I think your Dad looks more like himself than he has for several years also, he seems more like himself - the old sense of humour etc has come back. Part of it may be due to the interest in the new home & the beautiful, Edith I hate to see them leave the old home where we had so much fun but the new one is truly a dream home. I love to see and hear of the genuine welcome I know, as usual it is, with their perfect hospitality, it will probably seem just as much home to them as the old one. We enjoyed the visit & were interested & pleased with the improvements & changes and will be assured of a perfect welcome and rest in the way of a bunch of 4126 Broad Dames

They are so happy you will be in America & have been quite rugged on them, particularly your Mother, having you so far away. And when we believe we know and we cannot be there to help, it is quite hard

We are all well here Sandy had a minor operation but is seemingly fine again. Her hearing seemed to greatly improved

Well see you all when you come to Butler, by hook or by crook & if you come get up we shall go down

Love and may 1932 bring you all the best Edith J

Feb. 7, 1956

Dear Edith and Bo:

Following up mine of yesterday

This is just a supplementary note; the man I consulted re the taxes telephoned me and added this "info":

The maid need not estimate cost of board and room and add it as income if she stays at the home of her employer to oblige the said employer; in other words it would be the same as having her on call. I think under the circumstances the maid need not report any amount to cover board and room as income. But this is another item: You as the employer will have to pay 2 percent of her salary to Social Security, and she will have to pay the other 2 percent, though you can pay the entire 4 percent. Apparently these payments represent a "must".

The above sounds garbled, but you will understand.

Today the sun is shining brilliantly and it's just pleasantly cold—a bit on the snappy side. Yesterday was wicked; it rained all day long, not the "spitting" variety of rain, but a steady downpour. Understand the farmers were glad of the rain.

Last night was my late night; as a rule it isn't too hard to take, but last evening it was 8:45 before I finished. Even so it wasn't that real steady work of yore. Many days in this section, years ago, we might have nothing to do all day long—the reps were at meetings—and by evening they asked for volunteers and we really would work in such event! Times change. I don't think people work as hard as they did. The thing that astonishes me is the recognized "coffee break" all over these days, before we used to hurry down to the counter, and if we ran across the street we would hope no one saw us! Now folks sit down in the cafeteria and chat leisurely over their coffee.

A big hug for the little ones. It will be interesting to see them again, and especially the latest addition to your household. At least you and Bo will never run out of work with 4 little olive branches.

-ove- Esther

February 6, 1958

Dear Edith,

I was so happy to hear from you today - I thought that you might have returned to the U. S. and had not contacted me (I wouldnot have blamed you - after my lapse of correspondence). I had been hoping to hear from you ever since Christmas so I was overjoyed to learn that you are going to join me here in Washington. Steve too is away so much that I know that you and I will find each other very companionable -- that is - when and if the children are quietly tucked qaway for the night.

Congratulations to you and Bo and the new little son. You are busy and you certainly need help - I would definitely bring the German girl if she is satisfactory. Good maids are hard to find and especially the live-in variety. I have had the one I have now for a little over a year and pay her $52/00 a week and she is off on Thurs. afternoon and every Sunday (I wish that it were every other Sunday which some people are able to manage). There is a scmall payment for social security which we are beginning. Then of course there is a paid vacation which is up to the employer. This is the median wage - some people pay $35 to $40 and colored day's workers who come in for the day are easy to get-- unlike N. Y. or Phila.

Do you wanto to bpy or rent a house? I imagine that you would have to pay at least $40,000 up (depending upon location and size and condition of house) for the six bedrooms. Bigh house are sometimes hard to find in the immediate city and I think that it would be best to move out a bit. Do you want to live in the country or in a settled community with other families? I think that Maryland would be best because of the school situation as well as be a little closer to N. Y., Phila., or Pittsburgh if that is where Bo goes. As far as train connections -- it is not good around here and I would suggest that you may find it good or cheaper to bring a foreign car over with you for a second car. Will Bo travel by car, train or plane - that may be a consideration in location.

Of course I will try to kine up houses for you or Bo to look over when you come -- and as you know Althea is here and she is still a dynamo of ideas and probably will want to help in any way she can. It will be a joy for both of us.

CONFIDENTIAL

Children have had colds all winter and It is depressing to be in house so much. Girard attends nursery school when he is able and willing. I have them both home today -- one at each elbow and the the baby is playing in his gated room with the Tv on for company. I have become very busy with community and social activities -- Co-chairman of Red Cross Fund Drive, Chairman of an Art Study gorpup --member osf League of Women Voter and will do some lobbying for home rule in the District of Columbia in few weeks. This does help to fill in the time when Steve is away but life without a Daddy is not right and I wish that it could be different. We have plenty of company in Washington, however, since this is quite common.

I know how thrilled your folks will be to have you and children b/ and do give them my best when you write to them.

Let me know more details of house and I will talke to realtors and get started. It's very easy to rent here if you would wish that but I always think that its cheaper to buy in the end.

Do send me a picture of all of you and kiss the little ones . Write me soon -- I am anxious to know more.

Love,

Frances

P.S. For domestic help by the hr. [illegible] rate is 60 ct. per hr. It would be less by wk or mo., but still high.

Apt. 522,
1711 Massachusetts Ave., NW
Washington 6, D. C.
Feb. 6, 1956

Dear Bo and Edith:

GREETINGS! What good news; to think you will be settling near Washington! Fine! Why not choose Washington instead? However, perhaps a suburb would be better, tho' there are any number of large lovely old houses right in Washington; most folks can't afford the upkeep. There aren't many who live in 10-room houses, but there are plenty of houses. Some perhaps aren't in very good condition; if you moved out from town the chances are the houses might be in better shape. One of my friends lives in Vienna, Virginia, and likes it a lot; another just bought a home in Falls Church (guess the distance from Wash. is about 15 miles); many people live in Rockville, Maryland, or Silver Spring. How that spot has grown! My husband I didn't want to buy in Silver Spring; we just didn't quite like it! We would have made a fortune on a little piece of property. I think I like Maryland better than Virginia, but not much difference.

A good thing you will be able to take Greta with you; you are going to find domestic servants expensive and not too efficient. Prices have skyrocketed, and with 4 babies you are going to need a lot of help! However, we have excellent elec. washers and dryers. I'll bet you were alarmed when they put you in bed for weeks before the baby came; thank goodness all went well. You must have been eating too many good things if the baby was so big. Weren't you pleased that it was a boy? I'll bet you were, especially as you have 3 gals. I think they're darling; that snapshot shows 3 very pretty little girls, and I suppose you just love 'em to pieces, so to speak. And are they interested in their little brother? I'll bet they are still saying "Titta - Titta"! As to the house, your best bet will be to go to a real estate dealer; I could open do that for you if I had any idea as to when you would arrive, etc. All of your children have Swedish names; yes? I had an uncle by the name of Anders; they really are different. And to think you bought Anders a baby spoon too! Indeed he too would have gotten one if you hadn't! I think the record of time of birth, etc. is cleverly accomplished by the engraving, and they are good, substantial [illegible]spoons

Under separate cover I am mailing you some income tax forms, etc. Hope you find all the "info" you need in the pamphlet. I made inquiry and the maid will have to show as income a given amount for room and board; I don't know who decides, but it will have to be added as income. When you fill out the forms you can inquire at the Internal Revenue Service; my man here didn't know exactly the amount.

To date we have had a heavenly winter, lots of sunshine and crisp, cold weather. Today, though, it's raining and gray; makes me think of the Bonn weather; it's too mild for Stockholm. However, we did have one sleety, icy day—Jan. 9. According to the papers there were 470 accidents, major and minor, but requiring hospitalization, in the District alone. I was one of the unfortunates, but thank goodness mine didn't require hospitalization. The streets were smooth as glass; I took a lady-like tumble and had a "kink" in my side, but didn't think much of it. By evening I felt worse, and the next day I couldn't pick up a thing from the floor without a lot of pain. Then I consulted the Dr. who said, "Of course you ache; you have fractured at least 2 ribs and are bruised." Believe me it has been a d....d nuisance! Even now I ache; it's when I turn, especially in bed; I can't get comfortable, readily. But—I'll live! I stayed home 10 days from the office nursing my ailment. In the middle of my indisposition, my effects arrived from Germany! They had to be unpacked; the place is small; the stuff was all over, on tables and on the floor, and I couldn't pick it up! Thank heaven for friends; they came to the rescue, and how I have crowded things into that one room I'll never know. I bought a beautiful break-front to house the pretty things I acquired abroad—I had plenty of ~~mydnackaker~~ before and it seemed hopeless when my effects from Germany arrived. I really felt "floored" but it's OK now; you will have to visit me and see the things I acquired. There are many times I wish for more space, but—when the terrific heat of summer rolls around I'll be glad of the air-cooling, even tho' my quarters are small. But I have had a lot of company just the same! It's amazing how readily I seem to be picking up the threads in Washington! By the bye, both Ida Lempton and Esther Sjostedt are here too, as I said before, and they both "Elsa"! I see them occasionally; we are CANASTA hounds still.

The children are really darling; what a lot of changes they are experiencing! I hope they won't forget both their German—some of it anyway—and their Swedish; I imagine they will be proficient in the latter. And won't grandma and grandpa in Seattle be glad to see them! MUCH LOVE—

Esther

Finsprång 30/1 16

Liebe Frau Hauptmann Hagelin!

Vielen herzlichen Dank für Ihren lieben Brief. Wir hatten gerne Freude.

Schade dass sie dieses verlassen. Werden wir uns wohl noch treffen? - Wahrscheinlich reise ich ab Finsprång in der Woche vor Ostern.

Was macht der kleine Anders? - Kann mir die Freude über die Ankunft seines Sohnes recht gut vorstellen.

Sehr gut habe ich Ihren schmeichelhaften Brief verstanden, aber selbst schreiben kann ich Deutsch nicht. Es gefällt mir nun viel besser in Finsprång, doch möchte ich nicht wissen, wo ich mein Leben lang hier bleiben müsste. Ab und zu habe ich aber einen Heimweh u. fast kann ich nicht mehr warten bis die 2 Jahre um sind. Helge arbeitet immer sehr viel u. ich staune, wie er alles bewältigen kann. Dir wird auch besser.

Am 25. XII hatten wir unerwarteten Besuch von Herrn Forselius, der war sehr lustig.

Sommar ist schrecklich / pres. Essen

Bitte sagen Sie mir einen passenden Termin, damit ich Ihnen Donnerstag Abend in Rosenbey warten kann und machen es Spaß mit Ihnen zu plaudern. Ich meine, dass Sie unsere schon einer Freude haben sie zu sehen.

Wir haben sehr kalt u. windiges Wetter, aber wunderbare Sonne. Der allerste Winter ist ja nun vorbei und wir freuen uns auf den Frühling.

Nun möchte ich Ihnen die herzlichsten Grüße senden u. gerne hoffe ich, Sie noch zu treffen in Berg.

Herzliche Grüße auch an Ihren Gatten

Ihre Annemarie
Kristoffersen

Feb 2 - 1956

Dear Edith + Bo

I sure have been neglectful about writing and I'm sorry. It seems now that the house takes a lot of my time. I'm trying hard to push things along and get it finished. We hope to be in now in about 3 weeks. The tile man is now putting the tile in the bath rooms and it should take him about a weeks after that we have the floors to finish and the plumbing fixtures to set and we should be ready to move in. The weather has been so many wet cold at times and snow too that it just slows up construction.

Mom got a letter from Annie the other day and a very nice little one although she says that she doesn't think she will be able to get out to Seattle on this trip. Hopes to make it at another time.

I checked on plane service between Vancouver + Seattle and it seems there are only 3 or 4 planes a day.

I checked with the traffic dept. here at Sears and they tried to find out about the plane from Amsterdam but all they could find out was that that plane landed either in New York or Montreal Canada. From Montreal they had to change to a Transcanada plane to Vancouver. The line from Amsterdam we thought was the "Royal Dutch Lines" and that might be wrong. So could you let me know the name of the line and if it goes "no stop" to Vancouver. The girl ~~that~~ at Sears who makes all arrangements on air flight tickets told me the girl at the air line who she always contacts for information is now on a tour of Europe and the girl taking her place is not too well informed. So if you will let me know the name of the air line I'll check here again and see what we can come up with.

We thought that the pictures you sent were just wonderful. It is so nice to see every one including you both. It seems

REF ID:A72[illegible]
CONFIDENTIAL

will be nice to see both of you again and see all the children too. We will have a lovely place for the children to play at the new home. They can have the big basement to play in and the floor has hot water coil in it so the cement floor will be warm to play on.

Every one wants to know when you are coming so be sure and let us know the date as soon as you know for sure.

I'm writing this letter at work so I think now I'd better sign off and see if I can do some thing for Sears now.

So goodbye for now
Love to all from Dad

Zug Switzerland.

Dear Sirs.

During the two weeks I have stayed here, the following actions have taken.

The first week we had a course for mechanics, when the army, signal corps, air force, navy, police and the foreign offices were represented. Most of the students were of high class, and they continued to study the machines by themself the second week, and they are writting instructions in spanish about the disassembling and assembling of the machines. I am confident with the results of the training of the men and that they will be able to keep the machines in good running order. The instruction for the officers regarding the possibilities of the machines in a cipher point, was held the second week. The army, navy representatives the airforce [illegible] the police with one detachment the navy one second lieutenant [illegible] with one man. [illegible] and the police one man. [illegible] have to [illegible] and at the same conference [illegible] the same second [illegible]

~~CONFIDENTIAL~~

During my visit at the ministery I had a very cordial discussion from Mssrs Hellberg and Malmström LME, and they are now also very well acquainted with the machines.
During the courses we also frequent with by:

work had a big interest in the procedure of instruction.
The tours when held in the conferen room of the Minister of Defence.
One demonstration when held for the intelligen service and they have decided to buy 60 machines please see enclosed offer.
Also they

The Pocket Cryptographer Type CD-55

The machine type CD-55 has been designed for such use, where extreme portability is of prime importance, and where the direct printing of the text can be dispensed with.

Through the use of novel keying and translating mechanisms it has been possible for us to design a machine, with the following overall dimensions: Width 75 mm (3"), Length 125 mm (4 5/8"), Height (Thickness) 28 mm (1 1/8"). The weight of the machine is about 350 grams (12 1/2 ounces).

The machine has been developed with the following two principal uses in view: for military purposes - lowest echelons and very advanced positions - and for diplomatic use.

The machine is provided with a keying mechanism, which is equivalent to that in our mechanical machines of the C-types (including the converter M-209).

The machine is operated in the following manner: After having removed the machine from its carrying case, the knob on its left hand side is pressed in as far as it can go, and released - when it will move outwards about 35 mms (1 1/2"). The lid of the machine is opened, the counter set at 0000, and the initial position is set, by arranging the key wheels according to agreement. Then the lid is closed.

For every letter to be ciphered or deciphered, the knob is pressed inwards, with the left hand thumb (the machine is held in the left hand) as far as it will go, and then released. When it has reached its outer position, the letter to be ciphered is located on the stationary outer ring, and the corresponding letter on the rotatable inner disk is read and noted by hand (or on y typewriter). When deciphering, the same procedure is used.

Important: The operating knob is during the operation pushed inwards against the tension of a spring, which after the knob having arrived

at its inner end position, returns it to outer end position. In order to ensure that the complete movement is obtained (which is necessary for the correct functioning of the machine), a check pawl is incorporated. This check pawl prevents the operating knob to return to its outer position before the inner end position is reached, and the operator is also prevented from pushing the knob inwards before the outer end position is reached; be therefore careful not to force the knob inwards if it is locked but make sure that it is allowed to go the full way out.

The main parts of the machine type CD-57 are the following:

1. The case, which consists of the bottom plate, which carries all parts of the mechanism, except the outer alphabet ring, which is lodged in the cover or lid of the machine.

2. The translating mechanism, which determines the positions, which the inner disk can take. This consists of six displacement disks, provided with stops, which can be arranged at will. We can for instance place the stop for the disk No. 1, so that this disk, when the stop is released, can turn a distance equal to one twenty-sixth of a revolution, the stop for disk No. 2, so that it will move 2/26, disk No. 3 3/26, disk No. 4 4/26, disk No. 5 5/26, and disk No. 6 6/26, which will give all possible displacement steps from 0 to 25 for the inner disk. A large number of different stop settings can be used, as the mechanism allows a maximum rotation for the inner disk of 32 steps.

3. The keying mechanism: There will be a choice of two different sets of key disks, one with ~~17, 19, 21, , 25 and 26~~ divisions, the other with 29, 31, 37, 41, 43, and 47 divisions. To rearrange the pins, it will be necessary to remove the key disks from the machine, which is easily done. There are six sensing levers, which are caused to press against the key disks when the operating knob is in its innermost position: for those of the key disks, where the pin protrudes and encounters its corresponding sensing lever, the lever will remain inactive. Where on the other hand the lever can move towards the periphery of the key disk proper, the upper end of the lever will desengage the corresponding displacement disk stop. If thus, with the stops arranged as indicated above, the sensing levers No. 1, 3 and 6 become active, then the inner alphabet disk will rotate 15 steps

No. 3039

A) One is that the standard setting 1 2 3 4 7 9 lugs, plus one extra lug for each wheel.

Wheel 1 gives then:		Wheel 4 gives then:	
	0 + 0 = 0		0 + 0 = 0
	1 + 0 = 1		4 + 0 = 4
	0 + 1 = 1		0 + 1 = 1
	1 + 1 = 2		4 + 1 = 5
2	0 + 0 = 0	5	0 + 0 = 0
	2 + 0 = 2		7 + 0 = 7
	0 + 1 = 1		0 + 1 = 1
	2 + 1 = 3		7 + 1 = 8
3	0 + 0 = 0	6	0 + 0 = 0
	3 + 0 = 3		9 + 0 = 9
	0 + 1 = 1		0 + 1 = 1
	3 + 1 = 4		9 + 1 = 10

Then the 4^6 different combinations have to be studied. Overlapping can also be adopted. In this case the step "1" can be made seven different ways plus the steps "27" which I dont know how many time they will occur.

B) The other way is that the step "1" will not be represented too often.

Key wheel:	1	2	3	4	5	6
	1	1+1	3	2+4	3+4	5+6

Wheel 1 gives then:		Wheel 4 gives then:	
	0 + 0 = 0		0 + 0 = 0
	1 + 0 = 1		2 + 0 = 2
	0 + 0 = 0		0 + 4 = 4
	1 + 0 = 1		2 + 4 = 6
2	0 + 0 = 0	5	0 + 0 = 0
	2 + 0 = 2		5 + 0 = 5
	0 + 0 = 0		0 + 4 = 4
	2 + 0 = 2		5 + 4 = 9
3	0 + 0 = 0	6	0 + 0 = 0
	3 + 0 = 3		5 + 0 = 5
	0 + 0 = 0		0 + 6 = 6
	3 + 0 = 3		5 + 6 = 11

There will be quite a complicated calculation before the best lug settings are established, but I do think when this is done, it will be enough change the positions on the keywheels and the pins on the keywheels.
