

June 7, 1941.

Mr. Salmon:

Following is a list of posts where, according to plans on file in this office, there appear to be built-in vaults of fireproof construction equipped with fireproof doors:

Buenos Aires  
Rio de Janeiro  
Ottawa  
Paris  
London  
Tokyo  
Mexico City  
Montevideo  
San José  
Ciudad Trujillo  
Helsinki  
Berlin  
Monrovia  
Istanbul  
Panama

At those posts where vaults of this type do not exist, in most instances, the plans indicate that a room has been reserved for archives and made secure by putting iron grills at window openings and secure locks on doors where necessary. In addition, all of our offices have been provided with safes or fireproof cabinets.

\*These offices are under construction but should be ready for occupancy within the next two or three months.
