

1. Your 700/1 ratio of dollar spending is our best estimate of value of Comdant during WWII.
2. It is reasonable to accept this as an ~~estimate~~ ^{admittedly unreliable} estimate of the value of at least the research effort of AFSA; if this is successful,
3. AFSA's research budget is said to be of the order of magnitude of $\$1.4 \times 10^7$ per yr.
4. $\$1.4 \times 10^7 \times 700 = \10^{10} per yr.
5. As an off the cuff guess $\$10^{10}$ is about 5% or 1/20 of the ^{total} national ^{annual} income - this may be a very poor estimate.
6. There are about 50 military men on active duty with rank at least 3 stars & comparably many civilians in super-grades. This is an unreliable estimate.
7. AFSA does not have a fair percentage of these.
8. AFSA has no charter authority to protect this tremendously important portion & authoritative control.

if possible at all will come about that best
through the influence an officer of high rank
(at least 3-stars) implicitly wields - especially
if he is one who is ascending.

on T.
