

NSA/CSS Evaluated Products List for Paper Disintegrators

OVERVIEW

Devices included on this list have passed evaluation by meeting requirements set by the NSA/CSS for the sanitization of paper with notations to those devices also approved to destroy punched (key) tape, and CDs. Meant to serve as guidance, inclusion in this document is not an endorsement by the NSA/CSS or the U.S. Government. All listed products sanitize TS/SCI and below.

The NSA/CSS conducts continuous research on data recovery and data sanitization. This document is updated on an as-needed basis. The procedures for administration and distribution of the EPL are subject to change without notice. Please see Expired Products list for more information about removed products.

Questions about specific models can be directed to the Center for Storage Device Sanitization Research at 301-688-1053 or CSDSR_NSA@nsa.gov.

REQUIREMENTS SUMMARY

Paper disintegration devices must reduce paper and/or punched tape to an edge size of 3 millimeter by 5 millimeter, or less.

Devices that meet NSA/CSS sanitization specifications for the following storage devices are identified with the following approval ratings:

- Paper
- Key (punched) tape (plastic or paper)
- CDs

It is recommended to mix paper with CDs during destruction. Devices within this document are NOT authorized for DVD or Blue-ray Disks sanitization.

Inclusion in this list does not guarantee the continued performance of equipment. Customers should re-test equipment according to manufacturer guidance.

IMPORTANT REMINDERS

This list serves as guidance for the sanitization of paper storage devices, and identifies devices also approved for the destruction of paper/plastic punched (key) tape and CD optical storage device format.

For CDs, remove all labels or markings that indicate previous use or classification.

Each device offers different convenience features, capacities, feed sizes, footprints and power requirements. Contact the vendor to identify the unit(s) best suited to your site's needs.

Equipment is listed in alphabetical order by vendor. Models that are no longer manufactured but still approved are included as well. Model numbers on equipment must match the model numbers shown in this list.

Alternate or previously used retail names appear in parentheses.
