Pueblo Task Force Review

The B11 Pueblo Task Force has completed the total review of all available material surrounding the North Korean seizure of the USS Pueblo. Findings have been documented in a basic narrative report which summarizes all SIGINT and collateral reflections of North Korean activity on a daily basis 1# - 23 January. Supplementary detailed information, such as traffic, SIGINT product, confessions, etc. is available in B11 spaces, and is appropriately catalogued in appendices to the basic narrative. A copy of the basic report is provided to you herewith for perusal and recommendations for further disposition.

B11 is prepared to formally brief you and your staff and any other appropriate persons concerning the scope, problems and ultimate findings evolving from this review. This would include casual display of all SIGINT materials used and other accoutrements such as maps and significant collateral such as crew joint letters and confessions.
