USCIB: 3.8/3

30 August 1954

~~TOP SECRET~~MEMORANDUM FOR THE MEMBERS OF USCIB:

Subject: Reorganization of Canadian COMINT Policy Control Structure.

Reference: USCIB 3/87 dated 22 April 1952.

1. The enclosed messages between SUSLO, Ottawa and the Executive Secretary, USCIB are circulated for information.

2. Members will recall that, as described in the reference, the Communications Research Committee (CRC) was the Canadian COMINT policy body established to advise the so-called Senior Committee on communications intelligence matters and to give general direction to the operations of the Canadian governmental COMINT agency known as CB (Communications Branch). CRC has been equated approximately with USCIB while CB equates with NSA. The ultimate Canadian national authority for maintaining policy control over all aspects of communications intelligence has been the above mentioned Senior Committee chaired by the Under Secretary of State for External Affairs and otherwise composed of the Chiefs of the Armed Services and sub-cabinet level representatives of other interested departments and councils. The Chairman, CRC served as Secretary to the Senior Committee. Thus in the former organization, and although roughly equated with USCIB, CRC actually had in many respects functions similar to those of the USCIB Executive Committee although the level of representation was one step higher. Nevertheless, the more important functions of USCIB seem to have more nearly equated with those of the Senior Committee.

3. The reorganization mentioned in the enclosed SUSLO message would appear to have the effect of replacing the Senior Committee with the new "Communication Security Board" whose functions may be expected to correspond closely to those of USCIB whilst the former CRC falls in line with the USCIB Executive Committee and Mr. [ ] operates in some respects in the same capacity as USCIB's Executive Secretary although at a considerably higher level and with greater authority than the latter. In sum, the new Canadian organization appears to be markedly similar in concept to the present USCIB structure although its subordinate elements would appear to include broader responsibility and authority than its USCIB counterparts.

4. THIS DOCUMENT AND ITS ENCLOSURES CONTAIN COMMUNICATIONS INTELLIGENCE INFORMATION AND SHALL BE HANDLED ONLY IN CHANNELS EXPRESSLY PROVIDED FOR COMINT.
