London

15 January, 1953.

LSIB/27/53

Chairman,
United States Communications Intelligence Board.

A.C. of S. (I)
S.H.A.P.E.

Signal Service to SACEUR Commands

At its meeting on 13th January, 1953, the London Signal Intelligence Board considered the recommendations of the U.S./U.K./SHAPE Conference held during December 1952 on Comint dissemination to and within S.H.A.P.E. and its sub-commands, and took note of A.C. of S.(I). S.H.A.P.E.'s approval.

2. The Board endorsed the recommendations of the Conference, on the understanding that L.S.I.B. or U.S.C.I.B. can be assured in all cases that satisfactory security arrangements can be made for handling the Comint material in all relevant headquarters under S.H.A.P.E. particularly in those where the intelligence staffs include other than U.S.-J.K. nationals. In this connection, L.S.I.B. is satisfied with present arrangements in 2nd T.A.F. and B.A.O.R. and in collaboration with A.C. of S.(I). S.H.A.P.E., is now investigating the possibility of making suitable arrangements in A.F.N.E..
