Prof. A. M. Gleason
Department of Mathematics
Harvard University
Cambridge, Massachusetts

Dear Andy:

Please accept my belated thanks for your one week with us. As always, you gave us a very much needed lift and we are looking forward to seeing you again in the near future. On any occasion when you have a little time to spend with us please do not hesitate to let us know. Despite your misgivings on the topic I really believe that you make considerable technical contribution while you are here.

If you can't get down here before this summer I should like to go up to Boston to talk to you about SCAMP. Shaw, Schmitt and Company have pulled out of SCAMP on the grounds that it is really not serving their immediate interests. While this may be correct it puts us in the position of having to provide other people for the presentation of the O6 problem. I am counting on Marshall Hall and Al Clifford to do some of this and of course there will be Oscar Rothaus and myself for some, but it may be necessary to use you on this project during the month of August. So please be sure to let us know if it appears that you will not be in Washington any time before SCAMP.

Ginny continues to send her very entertaining letters and has received word that she can take up to twenty days leave. As you might guess, this makes her very happy. I wish I felt the same.

Very cordially yours,

R. A. LEIBLER
Chief
