CLASSIFICATION OF SCAMP WORKING PAPERS

R/D

AG

11 Feb 55
Col. Campbell/AG/60235/mp

1. The 1954 SCAMP Working Papers were reviewed by the Classification Advisory Panel on 10 February 1955 for the purpose of determining the proper classification of the subject papers. The following members together with representatives from R/D were in attendance:

- | | |
|-------------------------|-----------------------|
| Mr. Friedman (Chairman) | Colonel Campbell (AG) |
| Mr. Callimahos (TNG) | Major Carson (P/P) |
| Mr. Hilsbos (SEC) | Dr. Leibler (R/D) |
| Dr. Shaw (PROD) | Dr. Blankinship (R/D) |

2. The Panel approved the following actions:

<u>Title of Paper</u>	<u>Present Classification</u>	<u>Approved Classification</u>
No. 1. Cyclic Phenomena in the Partition Function	S	U
No. 2. Exhaustive Search Technique for Shoelace	C	S
No. 3. On Statistics of an Unknown Rough Population	C	C
No. 4. On the Sum of Permutation Matrices	C	*
No. 5. Modification of the Simple (Mod 2) Koken Machine	S	**
No. 6. Modification of the Simple (Mod 2) Koken Machine II	S	**
No. 7. Some Properties of Permutations	S	*
No. 8. Flat Permutation Distribution Matrices	C	**

Notes: * Based on the interpretation by the PROD Representative of paragraph 16, appendix B of the UKUSA agreement, these papers should be classified Top Secret Codeword. Dr. Leibler of R/D did not agree with this interpretation. In view of the divergent views of the Panel on the classification of these papers, the Chairman requested R/D and PROD to present their views in writing for further evaluation. In the event a clear-cut decision cannot be obtained within NSA, the matter is to be submitted to USCIB for an interpretation of paragraph 16 of appendix B.

** The Panel agreed on the classification of these three papers. However, inasmuch as they deal primarily with COMSEC matters and COMSEC is not represented on the present Panel, the Chairman directed that these papers be forwarded to COMSEC for comment or concurrence in present classification.

3. The Chairman requested Dr. Leibler to recall all copies of papers No. 4 and 7 in view of the possibility that they may become Top Secret Codeword material and should, therefore, not be given distribution outside of NSA.
