

~~TOP SECRET~~*Office Memorandum* • UNITED STATES GOVERNMENT

OOB Item No. 110

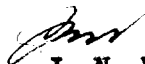

TO : AFSA-00

DATE: 17 Jan 1951

FROM : AFSA-OOB

SUBJECT: French insecurity.

In regard to problem of French insecurity, it is suggested that consideration be given to an approach along the lines of exchange of information on general communication security practices, most of which we have already declassified. We could do this ostensibly for the purpose of arriving at standard practices as preliminary to active cooperation. In this way we could get some actual measure of French security knowledge and procedures. We could also attack the problem, initially, at the weakest point. With the knowledge thus gained, we would be in a better position to determine what further action may be required.
