It is known that the Olivetti Company has produced cipher teleprinters which were described by experts in 1943-1944 as being "...materially weaker than ..., and therefore...(not up to)...present day security demands...". The latest (1952) catalogs of the Olivetti Company are on file in the NSA-181 Technical Library.

In addition to these developments in the

Declassified and approved for release by NSA on 03-14-2014 pursuant to E.O. 13526
On the basis of available evidence, one might assume that [ ] are being adapted for use on an [ ] teleprinter. The possibility is also suggested that [ ] may use such means of communication. The more remote possibility that current developments [ ] foreshadow the introduction of [ ] teleprinter encipherment throughout the entire [ ] should not be wholly discounted.
