13. (1) It is not advisable to redesign the SIGABA to permit simultaneous cutting of tape with the printing operation because of the many conditions of usage where such a feature is not required. There is now under development, and nearly completed, an attachment for the SIGABA which will provide this desired feature.
- (2) Concur. Projects have been initiated to develop equipment to supply this need. (Converters MX 507 ()/U and MX 508 ()/U.)
- (3) Concur. A device of this type is now under development. (Converter MX 519 ()/TG.)
