

NATIONAL SECURITY AGENCY CYBER EXERCISE

NCX 2018 PREVIEW VIDEO (MediaPro ticket 199275 TVC#8781)

SCRIPT TO VOICE 20180228

"Reporter" voiceover

"A cyber-attack shut down computer systems across the country for several hours today..."

"...Networks remain extremely vulnerable to malware..."

"...Many institutions and people simply ignore the risks..."

Voiceover A

As an increasing number of events infect the ether of our digital world, cybersecurity emerges as a crucial component of strong national defense.

"Reporter" voiceover

"...As much as one hundred terabytes of data was hacked..."

"...The cost of the breach could reach four billion dollars..."

Voiceover B

Cybersecurity isn't merely safeguarding servers, switches and chips.

It is securing your school, your job, your home...

It protects your friends... your family.

Cybersecurity stands on guard for you.

Voiceover C

Since 2001, the crucible to challenge the U. S. Service Academies as they confront the invisible enemy at the gateway has been the Cyber Defense Exercise.

This cybersecurity simulation offers a grueling competition to prepare America's next wave of war fighter.

Voiceover D

In the past, cadets and midshipmen from the Academies at Army, Navy, Air Force, Coast Guard, and Merchant Marine competed individually.

Now, they gather in one arena.

Voiceover E

And no longer is the NSA Cyber Exercise only about defense. NCX implements response tactics to better counter cyber threats.

On this virtual battlefield,
blue marks the uniform of the defensive unit fortifying networks.

Lurking opposite of the blue defenses is the red team...
the infiltrators, scrambling through offensive tactics
to expose vulnerabilities,
plant disruptions,
and siphon secrets.

Voiceover F

The education and training of NCX advances cybersecurity through trials of teamwork, planning and decision-making that will stress the teams from the five Military Academies over the course of three adrenaline-rushing days.

Voiceover G

The school that compiles the highest point total through this cyber-tactical war game captures the Director's Trophy... and victory in the National Security Agency Cyber Exercise.
